

Discproducer PP-100

Overview

What is Discproducer?

Epson's new disc publisher

Epson's first automated disc product

Epson cooperated with Taiyo-Yuden to optimize results on WaterShield media, producing high quality labels

Superior printing on any ink jet media

Great machine for duplicators to

Get into ink jet printing

Serve short run production needs

Use as an auto printer

Epson Advantages

Exceptional print quality

See for yourself
More details in a minute

Patented AcuGrip disc picking technology

Minimizes rejects from stuck together discs

Extra reliable robotic arm

A weak point in many publishers
Seiko-Epson has made robotics for decades (think watch assembly!)

Fast production speed

30 CDs or 13 DVDs per hour (full coverage both sides)

Unique ability to mix CD and DVD jobs without intervention

Kiosk mode only

Careful disc handling

Discs are always placed in position, they never slide – to prevent scratching

Easy to use, integrated software

Just one application to organize data, edit labels and publish

Discproducer Overview

100 disc capacity

Epson ink

6 individual color cartridges

- No wasted ink when one color depletes

Dye ink for brilliant color

High capacity ink cartridges; set of ink prints over 1,000 labels

Enclosed case keeps dust out and prevents production problems

Clear status reporting via LEDs
